

ROTARY SWEEPER

<http://tiny.cc/rotarybroom>

FEATURES & BENEFITS

- Remotely controlled hydraulic angle adjustment
- Long lasting bristle material
- Equipped with extendable supports for storage: nylon brush doesn't get damaged during storing
- Direct drive transmission, low maintenance

Dirt, dried mud, light snow and other debris are quickly and efficiently swept away with this hydraulically driven attachment. Whether you're sweeping driveways, farm yards or warehouses, you can rely on the rotary broom to get the job done right.

The brush can be hydraulically tilted 30° both on the right and on the left comfortably from the driver's seat. There are two adjustable wheels that keep the height of the brush constant from the ground and an elastic joint able to absorb small shocks avoiding possible damage.

The sweeper is equipped with supports which can be extended when the sweeper is not in use, so that the sweeper rests on the supports and the nylon brush doesn't get damaged during storage. Combined with a MultiOne machine with fully cab is the ideal attachment for the autumn and winter maintenance. **Note: the floating boom valve on machine is required.**

Model	Brush Diameter	Brush Material	Brush Width	Brush Width at Max Angle	Weight	Code
130	60 cm (23.6 in)	nylon	130 cm (51.2 in)	113 cm (44.5 in)	160 kg (353 lbs)	C890241
160	60 cm (23.6 in)	nylon	160 cm (63 in)	139 cm (54.7 in)	190 kg (419 lbs)	C890242
